RESEARCH IN EUROPE

MEMBERSHIP LEVELS & EXAMPLES OF THE BENEFITS

SUPPORT & INFORMATION

	PLATINUM	GOLD	SILVER
Information on Euro-Biolmaging training programs			
Information on technological status of Euro-Biolmaging Nodes			
Representation of industrial activities and opinions to national and EU political community			
Personal support of industry users of Euro-Biolmaging services			
Access to tailored usage data and statistics			
Individually tailor proposals on useful activities and interactions with Euro-Biolmaging community			
Participation in common lobbying activities e.g. at the national and European level (Brussels)			
Reports from the users, information on potentially useful samples, success and satisfaction rate			

MARKETING

Appearance in promotional public Industry Board material			
Company logo on Euro-Biolmaging website			
Company logo and advertising material at Euro-Biolmaging events			

MEETINGS

Participation in Industry Board meetings			
Personal invitation to Euro-Biolmaging stakeholders' meetings

GOALS OF THE EURO-BIOIMAGING INDUSTRY BOARD

- Create a platform for industry-science cross collaboration
- Strengthen communication with imaging technology users and imaging facilities, enabling timely understanding of users' needs
- Participate in "One Voice" activities to the political community at the national and European level in order to increase the bioimaging market
- Stay up-to-date with use of technology and software at Euro-BioImaging Nodes and needs of researchers
- Cooperate with Euro-BioImaging Nodes on the development and testing of novel technologies
- Participate in Euro-BioImaging training activities

WHAT IS EURO-BIOIMAGING?

Euro-BioImaging is the pan-European Research Infrastructure for Imaging Technologies in Biological and Biomedical Science. It is an open access resource for all life scientists providing:

- Access to biological and biomedical imaging technologies in Europe
- Image data repositories and analysis tools
- Training opportunities in imaging

The Euro-BioImaging Industry Board is the bridge between imaging industry, researchers and imaging facilities. Close relationship with Euro-BioImaging is opening the door to up-to-date information about current trends in imaging technologies, organisation of joint training programs and common lobbying activities.
